Lab Management Series

Herding Cats: Effective Leadership in Science

Monday, January 10, 2011
Noon to 1:00 p.m.
Thier Conference Room

MGH laboratories are staffed by some of the best and brightest scientists and engineers, and this can lead to management challenges for PIs who are charged with creating a research team with bright individuals from many different backgrounds.

In this workshop, you will gain skills and insight on how to lead and manage smart, technically trained people in the lab setting.

Speaker
Gwen Acton, PhD
President, Women Entrepreneurs in Science and Technology
CEO, Vivo Group
