1:00 pm  Reception
We are pleased to publish the tenth edition of the Tribute Book highlighting the many accomplishments of the women faculty here at MGH! Please take a moment to review the significant accomplishments in the 2010-2011 academic year (July 2010 - June 2011).

How was this information compiled?
Information for all sections was received by the women faculty themselves, the hospital departments and the Harvard Medical School. Please note: there may be oversights or publishing errors.

Thank you to all who shared this information with us. We salute these wonderful achievements in science and medicine!

Most sincerely,

Donna

MGH created the Office for Women’s Careers (OWC) in March of 1997 to foster a gender equitable environment to assure that women faculty will be given the same opportunity as men faculty to succeed in research and clinical careers at MGH.

The OWC facilitates the career advancement of women faculty at MGH. Areas of emphasis for this office are to:
· Increase the number of women faculty promoted by academic criteria
· Increase the number of women faculty in leadership positions
· Increase retention and job satisfaction of women faculty
· Develop programs to promote career development and work-life balance
· Provide individual counseling, advice and support

In addition, OWC strives to celebrate the accomplishments of women. Hence, every year the office puts on a reception to honor all of the women who had special achievements during that year. This is our 14th annual reception to honor women’s achievements at MGH!

Claflin Distinguished Scholar Awards

In 1993, the Women in Academic Medicine Committee, originally chaired by Mrs. Jane Claflin, was established to facilitate the academic careers of women in science at MGH. Recognizing that a significant obstacle to career advancement was the difficulty of maintaining research productivity during the child-rearing years, this committee, with the sponsorship of ECOR, established the Claflin Distinguished Scholar Awards. The purpose of these awards is to provide bridge funding for junior faculty to overcome this obstacle. It is intended that this transitional funding will increase opportunities for women to advance to senior positions in academic medicine.

Awards are for two years, with a maximum of $50,000 per year, in direct costs per year.

In the year 2011, the following six women were chosen as the recipients of the Claflin Distinguished Scholar Awards.

Andrea L. Giaranello, MD, PhD
Instructor, Department of Medicine/Internal Medicine/Division of Infectious Disease
“Better Drugs, Better Access to Care: Improving Health Outcomes for HIV-Infected Women and Their Children in Zimbabwe.”

Elizabeth A. Lawson, MD
Instructor, Department of Medicine/Neuroendocrine
“The Neurobiology of Appetite Pathways in Anorexia Nervosa.”

Caterina Mainero, MD, PhD
Instructor, Department of Radiology/Athinoula A. Martinos Center for Biomedical Imaging
“Cortical Inflammation and Demyelination in Multiple Sclerosis by PET-MRI.”

Ebru Oral, PhD
Instructor, Department of Orthopaedic Surgery/Orthopaedics Biomechanics & Biomaterials Lab
“Porous-backed Polyethylene with Improved Fatigue Strength as an Alternative to Catastrophically Failed Metal-on-Metal Implants.”

Tatiana Sitnikova, PhD
Instructor, Department of Psychiatry/Psychiatric Neuroimaging

Jennifer A. Wargo, MD
Instructor, Department of Surgery/Surgical Oncology
“Exploring Cooperative Therapeutic Strategies in Combined BRAFTargeted Therapy and Immunotherapy for Melanoma.”

### Historical Highlights

Celebrating our past...to honor the MGH bicentennial. The accomplishments of women in medicine at the MGH follows below. Women in medicine have now been on staff at the MGH for the past 95 years. This timeline attempts to highlight their accomplishments at the MGH from the beginning of their struggles for acceptance in the mid-1800s to the present. Please note: there may be oversights or publishing errors.

MGH Overview

Founded in 1811, Massachusetts General Hospital (MGH) is the third oldest general hospital in the United States and the oldest and largest in New England. The 907-bed medical center offers sophisticated diagnostic and therapeutic care in virtually every specialty and subspecialty of medicine and surgery.

Each year, MGH admits 47,000 inpatients, handles nearly 1.4 million outpatient visits, records 88,000 emergency room visits, performs 38,000 operations and delivers 3,600 babies at its main campus and at its four health centers in Charlestown, Chelsea, Revere and the North End. MGH also holds concurrent Level 1 verification for adult and pediatric trauma and burn care.

MGH conducts the largest hospital-based research program in the United States with an annual research budget of nearly $550 million. It is the original and largest teaching hospital of Harvard Medical School, where nearly all staff physicians serve on the faculty. MGH is consistently ranked among the nation’s top five hospitals by U.S. News and World Report, which currently ranks MGH as first in the metro Boston area and second in the U.S.
