Topic:
“Gender Equity in Academic Medicine: Insights and Innovations”

1:00 pm  Networking
We are pleased to publish the thirteenth edition of the Tribute Book highlighting the many accomplishments of the women faculty here at MGH! Please take a moment to review the significant accomplishments in the 2013-2014 academic year (July 2013 - June 2014).

How was this information compiled?
Information for all sections was received from individual women faculty themselves, hospital departments and Harvard Medical School. Please note: there may be oversights or publishing errors.

Thank you to all who shared this information with us. We salute these wonderful achievements in science and medicine!

Most sincerely,

Donna

MGH Overview ............................................. 100
MGH created the Office for Women’s Careers (OWC) in March of 1997 to foster a gender equitable environment to assure that women faculty will be given the same opportunity as men faculty to succeed in research and clinical careers at MGH.

The OWC facilitates the career advancement of women faculty at MGH. Areas of emphasis for this office are to:

- Affect the number of women faculty in leadership positions
- Increase the number of women faculty promoted by academic criteria
- Increase retention and job satisfaction of women faculty
- Develop and implement programs to promote career development and work life balance
- Provide individual counseling, advice and support

In addition, OWC strives to celebrate the accomplishments of women. Hence, every year the office hosts a reception to honor all of the women who had special achievements during that year. This is our 16th annual reception to honor women’s achievements at MGH!
Office for Women’s Careers (OWC) Advisory Council
Originally formed in September of 1993 by honorary trustee Jane D. Claflin, the OWC Advisory Council (former Women in Academic Medicine Committee) at the MGH provided the original impetus for the creation of the OWC. The council continues to provide oversight and review OWC priorities and activities.

Claflin Distinguished Scholar Awards

In 1993, the Women in Academic Medicine Committee, originally chaired by Mrs. Jane Claflin, was established to facilitate the academic careers of women in science at MGH. Recognizing that a significant obstacle to career advancement was the difficulty of maintaining research productivity during the child-rearing years, this committee, with the sponsorship of ECOR, established the Claflin Distinguished Scholar Awards. The purpose of these awards is to provide bridge funding for junior faculty to overcome this obstacle. It is intended that this transitional funding will increase opportunities for women to advance to senior positions in academic medicine.

Awards are for two years, with a maximum of $50,000 per year, in direct costs per year.

In the year 2014, the following five women were chosen as the recipients of the Claflin Distinguished Scholar Awards.

Sharon Dekel, PhD  
*Instructor, Department of Psychiatry / Psychiatric Neuroscience Division*  
“Enhancing Maternal Bonding and Preventing Postpartum Symptomatology: A Novel Treatment Approach Utilizing Intranasal Oxytocin”

Sarina B. Elmariah, MD, PhD  
*Instructor, Department of Dermatology / Medical Dermatology*  
“Neural recruitment and activity in the pathogenesis of atopic dermatitis and cutaneous inflammation”

Daphne J. Holt, MD, PhD  
*Assistant Professor, Department of Psychiatry / Psychiatric Neuroimaging Division*  
“The Neural Basis of Paranoia: A PET/fMRI Study”

Lynn T. Matthews, MD  
*Instructor, Department of Medicine / Division of Infectious Diseases*  
“Safer conception for HIV-infected South African men who choose to conceive with an at-risk partner”

Elaine W. Yu, MD, MMSc  
*Assistant Professor, Department of Medicine / Endocrine Unit*  
“Bariatric Surgery and Bone Marrow Adiposity”

Founded in 1811, Massachusetts General Hospital (MGH) is the third oldest general hospital in the United States and the oldest and largest in New England. The 999-bed medical center offers sophisticated diagnostic and therapeutic care in virtually every specialty and subspecialty of medicine and surgery.

Each year, MGH admits approximately 48,000 inpatients, handles nearly 1.5 million outpatient visits, records more than 100,000 emergency room visits, performs more than 42,000 operations and delivers more than 3,600 babies at its main campus and at its four health centers in Charlestown, Chelsea, Revere, and the North End. MGH also holds concurrent Level 1 verification for adult and pediatric trauma and burn care.

MGH conducts the largest hospital-based research program in the United States with an annual research budget of more than $786 million. It is the original and largest teaching hospital of Harvard Medical School, where nearly all staff physicians serve on the faculty.
