Topic:
“From Chemical Engineering to
Clinical Department Chair:
Lessons Learned as a Woman in Academic Medicine”

1:00 pm  Reception
We are pleased to publish the eleventh edition of the Tribute Book highlighting the many accomplishments of the women faculty here at MGH! Please take a moment to review the significant accomplishments in the 2011-2012 academic year (July 2011 - June 2012).

How was this information compiled?
Information for all sections was received from the women faculty themselves, the hospital departments and the Harvard Medical School. Please note: there may be oversights or publishing errors.

Thank you to all who shared this information with us. We salute these wonderful achievements in science and medicine!

Most sincerely,

Donna

MGH Overview ....................................................... 79
MGH created the Office for Women’s Careers (OWC) in March of 1997 to foster a gender equitable environment to assure that women faculty will be given the same opportunity as men faculty to succeed in research and clinical careers at MGH.

The OWC facilitates the career advancement of women faculty at MGH. Areas of emphasis for this office are to:

· Increase the number of women faculty promoted by academic criteria
· Increase the number of women faculty in leadership positions
· Increase retention and job satisfaction of women faculty
· Develop programs to promote career development and work-life balance
· Provide individual counseling, advice and support

In addition, OWC strives to celebrate the accomplishments of women. Hence, every year the office puts on a reception to honor all of the women who had special achievements during that year. This is our 15th annual reception to honor women’s achievements at MGH!
Office for Women’s Careers (OWC) Advisory Council
Originally formed in September of 1993 by honorary trustee Jane D. Claflin, the OWC Advisory Council (former Women in Academic Medicine Committee) at the MGH provided the original impetus for the creation of the OWC. The council continues to provide oversight and review OWC priorities and activities.

Claflin Distinguished Scholar Awards

In 1993, the Women in Academic Medicine Committee, originally chaired by Mrs. Jane Claflin, was established to facilitate the academic careers of women in science at MGH. Recognizing that a significant obstacle to career advancement was the difficulty of maintaining research productivity during the child-rearing years, this committee, with the sponsorship of ECOR, established the Claflin Distinguished Scholar Awards. The purpose of these awards is to provide bridge funding for junior faculty to overcome this obstacle. It is intended that this transitional funding will increase opportunities for women to advance to senior positions in academic medicine.

Awards are for two years, with a maximum of $50,000 per year, in direct costs per year.

In the year 2012, the following six women were chosen as the recipients of the Claflin Distinguished Scholar Awards.

Amy Barczak, MD
Instructor, Department of Medicine / Division of Infectious Disease
“Understanding intracellular mechanisms of M. tuberculosis virulence.”

Susan Cotman, PhD
Assistant Professor, Department of Neurology / Center for Human Genetic Research
“Investigation of KCTD7 in neuronal ceroid lipofuscinosis.”

Katharina Eikermann-Haerter, MD
Instructor, Department of Radiology / Stroke and Neurovascular Regulation Laboratory
“Acute stroke evolution and outcome in migraineurs.”

Pouneh Fazeli, MD
Instructor, Department of Medicine / Neuroendocrine Unit
“The Effects of Acute Calorie Deprivation on Adipose Tissue Distribution and Bone Mass.”

Janet Lo, MD, MMSc
Assistant Professor, Department of Medicine / Neuroendocrine Unit
“Atherosclerosis and Inflammation in HIV Disease.”

Lecia Sequist, MD, MPH
Assistant Professor, Department of Medicine / MGH Cancer Center / Hematology-Oncology
“Furthering the Understanding of Acquired Resistance to EGFR TKIs.”

Founded in 1811, Massachusetts General Hospital (MGH) is the third oldest general hospital in the United States and the oldest and largest in New England. The 907-bed medical center offers sophisticated diagnostic and therapeutic care in virtually every specialty and subspecialty of medicine and surgery.

Each year, MGH admits 47,000 inpatients, handles nearly 1.4 million outpatient visits, records 88,000 emergency room visits, performs 38,000 operations and delivers 3,600 babies at its main campus and at its four health centers in Charlestown, Chelsea, Revere and the North End. MGH also holds concurrent Level 1 verification for adult and pediatric trauma and burn care.

MGH conducts the largest hospital-based research program in the United States with an annual research budget of nearly $550 million. It is the original and largest teaching hospital of Harvard Medical School, where nearly all staff physicians serve on the faculty. This year, MGH was named America’s best hospital by *U.S. News and World Report* based on the quality of care, patient safety and reputation in 16 different specialties.
