Annual Celebration of Women in Medicine month Program

September 18, 2008

3:00 pm    Registration/Networking

3:30 pm    Welcome
Peter L. Slavin, MD
President, Massachusetts General Hospital

Speaker
Jeanine Wiener-Kronish, MD
Anesthetist-in-Chief
Chief of the Department of Anesthesia and Critical Care and the Henry Isaiah Dorr Professor of Research and Teaching in Anesthesics and Anesthesia

Topic:
“Business Advice for Women Leaders in Medicine”
We are pleased to publish the seventh edition of the Tribute Book highlighting the many accomplishments of the women faculty here at MGH! Please take a moment and review the significant accomplishments during the last 18 months. This year, a new section “Women Faculty in Leadership” has been included as well.

How was this information compiled? Information for all sections was received by the women faculty themselves, departments and Harvard Medical School.

As it is certainly possible that there are some errors or omissions in this book, we apologize in advance for any oversights or publishing errors.

Thank you to all who shared this information with us. We salute these wonderful achievements in science and medicine!

Most sincerely,

Donna

105. ...................... MGH Overview
MGH created the Office for Women’s Careers (OWC) in March of 1997. Since then, OWC’s mission was, and continues to be, to facilitate the career advancement of women faculty. In addition to working to increase the number of women promoted on academic criteria and increasing the number of women faculty in leadership positions throughout the hospital, OWC strives to celebrate the accomplishments of women. Hence, every year the office puts on a reception to honor all of the women who had special achievements during that year. This is our 11th annual reception to honor women’s achievements at MGH!

In 1993, the Women in Academic Medicine Committee, originally chaired by Mrs. Jane Claflin, was established to facilitate the academic careers of women in science at MGH. Recognizing that a significant obstacle to career advancement was the difficulty of maintaining research productivity during the child-rearing years, this committee, with the sponsorship of ECOR, established the Claflin Distinguished Scholar Awards. The purpose of these awards is to provide bridge funding for junior faculty to overcome this obstacle. It is intended that this transitional funding will increase opportunities for women to advance to senior positions in academic medicine.

Awards are for two years, with a maximum of $50,000 per year, in direct costs per year.

In the year 2008, the following six women were chosen as the recipients of the Claflin Distinguished Scholar Awards.

**Jodie L. Babbitt, MD**
*Instructor, Department of Medicine/Nephrology-Program in Membrane Biology*

We would like to congratulate Nancy J. Tarbell, MD, who has been named Dean for Academic and Clinical Affairs at Harvard Medical School (HMS) effective Monday, July 28. She will be charged with coordinating clinical department reviews and will oversee various HMS affiliation agreements. Her portfolio will include the Office of Faculty Affairs, the Office of Faculty and Research Integrity, the Office for Diversity and Community Partnership and the Department of Ambulatory Care and Prevention.

We would like to thank Nancy on behalf of the MGH community for all she has done to advance faculty development initiatives. Nancy came to MGH in 1997, to start the Partners Office of Women’s Careers at MGH. During her time here, she has worked tirelessly to promote the advancement of MGH women faculty, spearheaded the growth of the Claflin Awards, counseled and advised countless faculty members, chaired the Women in Academic Medicine Committee, and in 2005, she expanded her role to the Director of the Center for Faculty Development, where she has been focusing on the Annual Career Conference initiative most recently. Nancy will continue at MGH in her clinical capacity, as a pediatric radiation oncologist.

Please join us in wishing Nancy much success as she embarks on her new journey at HMS!
MGH Overview

Founded in 1811, Massachusetts General Hospital (MGH) is the third oldest general hospital in the United States and the oldest and largest in New England. The 900-bed medical center offers sophisticated diagnostic and therapeutic care in virtually every specialty and subspecialty of medicine and surgery.

Each year, MGH admits more than 46,000 inpatients and handles nearly 1.5 million outpatient visits at its main campus and at its four health centers: in the Back Bay, Charlestown, Chelsea and Revere. Its Emergency Department records nearly 80,000 visits annually. MGH is the only hospital in the United States to hold concurrent Level 1 verification for adult and pediatric trauma and burn care. The surgical staff performs more than 35,000 operations and the MGH Vincent Obstetrics Service delivers more than 3,500 babies each year.

MGH conducts the largest hospital-based research program in the country, with an annual research budget of approximately $500 million. It is the oldest and largest teaching hospital of Harvard Medical School, where nearly all MGH staff physicians serve on the faculty. MGH is consistently ranked among the nation’s top five hospitals by U.S. News and World Report.
