Association of American Medical Colleges (AAMC)

Topic:
“The Wondrous and Challenging Journey of Women in Medicine and Science”
We are pleased to publish the eighth edition of the Tribute Book highlighting the many accomplishments of the women faculty here at MGH! Please take a moment and review the significant accomplishments in the 2008-2009 academic year from July 2008 to June 2009.

How was this information compiled?
Information for all sections was received by the women faculty themselves, departments, Mass General Physicians Organization and Harvard Medical School.

As it is certainly possible that there are some errors or omissions in this book, we apologize in advance for any oversights or publishing errors.

Thank you to all who shared this information with us. We salute these wonderful achievements in science and medicine!

Most sincerely,

Donna

86. MGH Overview
MGH created the Office for Women’s Careers (OWC) in March of 1997. Since then, OWC’s mission was, and continues to be, to facilitate the career advancement of women faculty at MGH.

Areas of emphasis for this office are to:
- Develop programs to promote career development and work life balance
- Increase the number of women faculty promoted by academic criteria
- Increase women faculty in leadership positions
- Increase retention and job satisfaction of female faculty
- Provide individual counseling, advice and support

In addition, OWC strives to celebrate the accomplishments of women. Hence, every year the office puts on a reception to honor all of the women who had special achievements during that year. This is our 12th annual reception to honor women’s achievements at MGH!

In 1993, the Women in Academic Medicine Committee, originally chaired by Mrs. Jane Claflin, was established to facilitate the academic careers of women in science at MGH. Recognizing that a significant obstacle to career advancement was the difficulty of maintaining research productivity during the child-rearing years, this committee, with the sponsorship of ECOR, established the Claflin Distinguished Scholar Awards. The purpose of these awards is to provide bridge funding for junior faculty to overcome this obstacle. It is intended that this transitional funding will increase opportunities for women to advance to senior positions in academic medicine.

Awards are for two years, with a maximum of $50,000 per year, in direct costs per year.

In the year 2009, the following six women were chosen as the recipients of the Claflin Distinguished Scholar Awards.

**Ingrid Valerie Bassett, MD, MPH**

Founded in 1811, Massachusetts General Hospital (MGH) is the third oldest general hospital in the United States and the oldest and largest in New England. The 900-bed medical center offers sophisticated diagnostic and therapeutic care in virtually every specialty and subspecialty of medicine and surgery.

Each year, MGH admits 47,000 inpatients, handles nearly 1.5 million outpatient visits, records 83,000 emergency room visits, performs 37,000 operations and delivers 3,700 babies at its main campus and at its four health centers in Charlestown, Chelsea, Revere and the North End. MGH also holds concurrent Level 1 verification for adult and pediatric trauma and burn care.

MGH conducts the largest hospital-based research program in the country, with an annual research budget of nearly $550 million. It is the original and largest teaching hospital of Harvard Medical School, where nearly all MGH staff physicians serve on the faculty. MGH is consistently ranked among the nation’s top five hospitals by U.S. News and World Report.
